# HCC Continuing Education/Non-Credit Fact Book

## Where did the data in this report come from?

The source for all of the statistics in this report are SWRXF02 (Seats Registration) extracts, run as described in the adjacent chart. Course registrations with a registration status of “WD,” or withdrawn, were removed from the data.

## What is the population studied in this report?

Students who took non-credit classes during the seven years studied. The students could have been classified as non-credit or credit students, but all of the courses (and the “seats” in those courses) were non-credit.

## How is a year defined in this report?

A year is defined as the summer and fall terms of year 1 and the spring term of year 2, as shown in the table below. (During the period studied, non-credit courses were not offered during the winter term.)

Source: Connecticut Board of Regents for Higher Education's Banner administrative data system, SWRXS09 non-credit registration data extracted in October 2014 for the previous year

Note (1) Registrations are coded as Workforce or Personal Development; those not coded are excluded from formal counts.

Note (2) Not only do students enroll at more than one college and within one or more sectors of higher education; they often register for more than one offering in a given semester or semesters over the course of the academic year. The subject of interest here is now registrations rather than individual students. When assessing total registrations, a duplicated count is the metric of choice. As such all college numbers, sector totals and the grand total will provide duplicated counts of registrations or seats.

Produced by the Connecticut Board of Regents for Higher Education, Office of Research and System Effectiveness
